Smart Vendor Portal Cloud improves the way you interact and collaborate with Vendors. This dynamic, secure solution provides superior vendor management and performance tools that significantly lower costs.
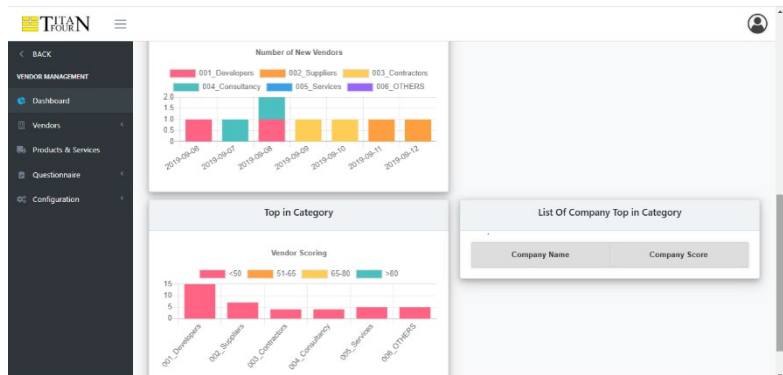

Improve Vendor Communication

Smart Vendor Portal is the next generation application for enabling smarter Vendor interactions. It is a cloud based self-service solution that brings a holistic approach to vendor management by removing communication barriers between you and your Vendors.

Vendors gain access a secure, integrated vendor work area that provides full visibility to transactions, offers closed loop collaboration, and enables electronic invoicing. The vendor work area provides a summary of activity and transactions that require attention. Vendors can access agreements, purchase orders, advance shipment notifications, invoices, and negotiations allowing Vendors to respond to your business needs.

SMART Vendor is a comprehensive qualification management system designed to improve Vendor compliance, data accuracy, and visibility.

Manage Vendor Qualifications for Key Business Objectives

Today's modern procurement organizations struggle with gathering and organizing Vendor information in a manner that best supports the overall business objectives. In addition to determining a Vendor's basic capabilities to deliver goods and services, you face a growing list of often competing objectives such as evaluating financial stability and risk of supply disruptions, monitoring environmental qualifications and sustainability initiatives, and tracking various compliance and regulatory requirements. Smart Vendor Cloud, an integral part of Titanfour Cloud solutions, provides a complete solution for managing your vendors' qualifications and capabilities, including monitoring compliance with your business policies and storing supporting documentation.
